Join us at the national Green Schools Conference & Expo for a day of inspiration, active learning and networking with other high school student leaders. Sessions will help students find their voices as passionate advocates for sustainability, stewardship and climate justice.

Sessions

**Expo Hall Scavenger Hunt**
Explore careers and opportunities in sustainability related fields.

**Youth Panel**
Learn from young climate activists who are making change in their communities. Come prepared with questions for the panelists. See bios to learn more.

**Environmental Problem Solving: Ocean Plastics**
Dive into the science behind ocean plastics with SOLVE/OPR. Learn about ocean currents and the impacts of ocean plastics. Explore art as activism through hands-on activities.

**Create Your Climate Justice Campaign**
Learn about the history of climate justice and how to create and grow a successful climate justice campaign through branding, social media and effective communication. Led by Washington Green Schools.

**Celebrating Successes, Troubleshooting Challenges**
Share recent successes and challenges from your school’s sustainability initiatives and learn from peers.

**Green Schools Conference & Expo Session**
From 3 to 4 pm, attend an Education Session at the conference. Browse session options at greenschoolsconference.org/#sessions.

Lunch, transportation and substitute teacher reimbursement available.

*Optional session

Youth Panel

**Lily Gardner**, a junior at Henry Clay High School in Kentucky, is a director of Future Voter Support work for Sunrise Movement. She also serves as the state policy director for Kentucky Youth Climate Strike and on the Bluegrass Youth Sustainability Council. She’s trained high schoolers from across the country in climate organizing and served on the Youth Climate Coalition. Watch Lily’s Ted Talk here.

**Rayan Krishnan** led his high school to pledge to meet the carbon emissions reduction goals of the Paris Climate Accord and formed the organization Schools Under 2 Degrees C to challenge other schools to reduce emissions. He created the game Operation Sustain to teach the science of climate change to elementary students.

**Isaac Vergun** is a climate activist and plaintiff in a lawsuit asserting the U.S. government has violated the youngest generation’s constitutional rights with policies that contributed to climate change. Isaac co-founded Youth Acting for our Earth (YAE!). He was twice elected to the Global Boards for Plant-for-the-Planet and was elected President of the Children’s Board. Learn more about Isaac here.
